As if today there is 1 Confirmed case & 91 Presumptive cases of the virus. Of 92, 41 in Middlesex County. 70 linked to Biogen employee/contacts, 4 Travel related & 18 under investigation.

\*\*\*Novel Coronavirus (COVID-19) Update as of 3/8/2020\*\*\*

**Please check regularly as this page is updated on an ongoing basis as the situation evolves.**

Be sure you are signed up for City alerts via phone, text and email, [click here](#):

To date, there has been 1 confirmed case and 27 Presumptive Cases of Coronavirus in Massachusetts; there have been more than 30,000 confirmed cases of the flu. The risk for coronavirus in the Commonwealth remains low; the risk for flu is high.

\*\*\*Novel Coronavirus (COVID-19) Update as of 3/5/2020\*\*\*

The Massachusetts Department of Public Health today announced its **second** presumptive positive case of COVID-19 since testing started Friday, February 28, at the State Public Health Laboratory. The woman is in her 60s and lives in Middlesex County. Her recent European **travel** included northern Italy. She was symptomatic, did not require hospitalization, and is recovering at home. The State Public Health Lab's result is considered presumptive positive and the specimens will now be sent to the US Centers for Disease Control and Prevention (CDC) for confirmation. This case brings the total number of COVID-19 cases in Massachusetts to three – one confirmed and two presumptive positive – since the outbreak started in the US in January. The risk to the public from COVID-19 remains low in Massachusetts.

On March 4, the [CDC issued an updated Travel Health Alert](#) for all United States residents, instructing travelers returning from countries with a Level 3 alert (currently China, South Korea, Iran, and Italy) to stay home and monitor their health for 14 days after returning to the US. This guidance also instructs travelers from countries with a Level 2 alert (currently Japan) to monitor their health and limit interactions with others for 14 days after returning to the US. The guidance advises against any non-essential travel to Level 3 countries.

The Woburn Health Department continues to monitor the global outbreak of Coronavirus (COVID-19). This novel coronavirus causes a respiratory (lung) infection. We are in close communication with the Massachusetts Department of Public Health (MDPH) and the Centers for Disease Control (CDC).

Coronaviruses are respiratory viruses and are generally spread through respiratory secretions (droplets from coughs and sneezes) of an infected person to another person. Symptoms of COVID-19 include fever, cough and shortness of breath, and, in severe cases, pneumonia (fluid in the lungs). Information is still limited about how this novel coronavirus spreads. More information on COVID-19 is available at [mass.gov/2019coronavirus](https://mass.gov/2019coronavirus).

According to the CDC, as of today, there have been 99 US cases of COVID-19 confirmed. Globally, more than 93,000 cases have been confirmed. There have been a total of 10 deaths in the US.

Although the risk of the novel coronavirus to Massachusetts residents remains low, and the risk of the flu is high, people are advised to take many of the same steps they do to help prevent colds and the flu, including:

- Wash hands often with soap and warm water for at least 20 seconds.
- Avoid touching your eyes and face.
- Clean things that are frequently touched (like doorknobs and countertops) with household cleaning spray or wipes.
- Cover coughs and sneezes with a tissue or the inside of your elbow.
- Stay home when feeling sick.
- Stay informed.
- Get a flu shot.
